# Getting Started

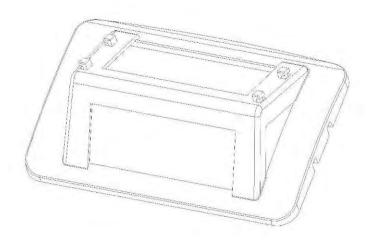

## **Packing List**

The package contains the following parts, please check if all the items are not missed:

1. The phone device

2. The footstand

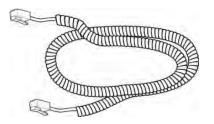

3. Handset

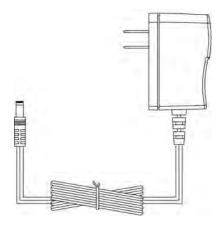

4. Headset cord

5. Power adapter

6. Ethernet cable

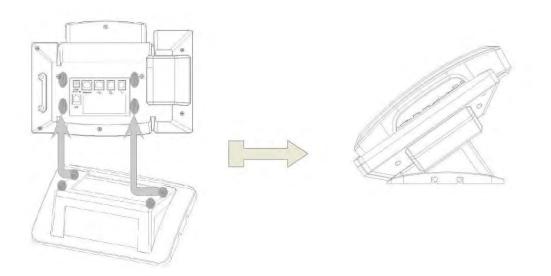

7. Quick installation reference

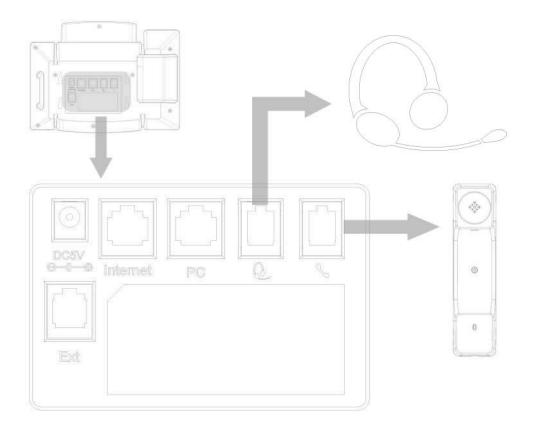

#### **Phone Installation**

## 1. Attach the Foot stand

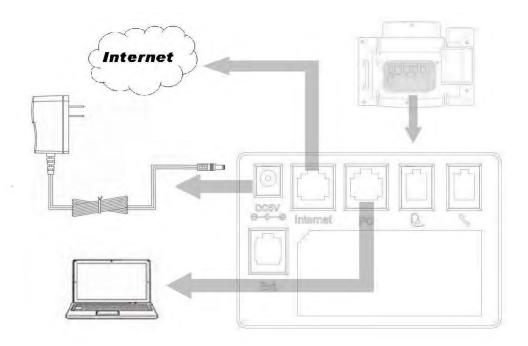

## 2. Connect the Handset and optional Headset

### 3. Connect the Network and Power

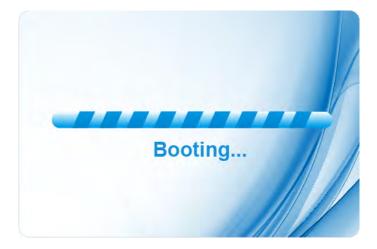

#### Initialization

After your phone has been powered up, the system boots up and performs the following steps:

Automatic Phone Initialization

The phone finishes the initialization process by loading the saved configuration. The phone LCD screen will display "Booting"

And then show "Initializing "during the initialization.

By default the phone attempts to contact a DHCP server in your network in order to obtain its valid network settings, e.g. IP address, subnet mask, default gateway, DNS server.

#### **Status**

You can view the system status of your phone via phone user interface or web user interface. The information of phone status includes: Information(e.g., Model, IP, MAC, Firmware, Hardware), Network(e.g., WAN Type, IP, Mask, LAN Type, Gateway, DNS...)Account (e.g., register status of accounts)

#### To view the phone status via phone interface:

1. Press Menu → Status → InformationNetwork/ Account

## Registration

#### To register via phone interface:

Press Menu→ Setting→Advanced settings(default password:admin)→Accounts

Select the desired account

Select Enable for Account active

Filled the SIP Server

Filled the Failover SIP server if need (Optional)

Filled the Outbound Proxy (Optional)

Filled the SIP User ID, Authenticate ID

Filled the password, Name (shown on LCD) and Ringtone.

Press Save to save the configuration.

# **E**-ltek

#### **User Interface**

There are two ways to customize specific configurations on your IP phone:

- The user interface on the IP phone
- The user interface in a web browser on your PC

The hardware components keypad and LCD screen constitute the phone user interface, which allows the user to execute all call operation tasks and basic configuration changes directly on the phone. In addition, you can use the web user interface to access all configuration settings. In many instances, it is possible to use both the phone user interface and the web user interface to operate the phone and change settings. However, in some instances, it is only possible to use the phone or the web user interface.

## Line Key Function Overview

## **Basic Features Configuration**

This part will mainly introduce the basic configuration as the Time, Language, and Volume...

1. Get the IP address: Press Menu  $\rightarrow$  Status  $\rightarrow$  Information.

- 2. Input the IP Address in the web browser.
- 3. Input the user name (default is admin), password (default is admin).
- 4. Login successfully.

#### Note:

The PC and phone should be in the same segment.

When register the accounts in web and the server port is not "5060", then "SIP Server" should be set as "SIP Server's IP address: server port.", for example, "192.168.0.122: 5090".

# -l-ltek

#### **Administrator Password**

The password is mainly used for login the web interface or set the advanced settings through phone interface. And the default password of the administrator is: **admin** 

#### To change to password via Phone Interface

- Press Menu → setting → Advanced settings → password (default admin) → Phone Setting → Set Password
- 2. Enter the current PWD (password), new password and confirm the new password.
- 3. Press save soft key or to save the new password.

	Seira	assword	
1.Current P	WD:		
2.New PWD	):		
3.Confirm:			

#### To change to password via Web Interface

- 1. Management  $\rightarrow$  Password
- 2. Fill the value
- 3. Click SaveSet to save the configuration.

Note:

When you use the web interface: user name: admin

password: admin(default)

### **Basic Network Setting**

Htek IP Phone support three mode of Network: DHCP, Static, and PPPoE. The default mode is DHCP, it will obtain IP address and other information automatically.

If your phone cannot contact a DHCP server for any reason, you need to configure a static IP address manually.

When switch DHCP, Static IP and PPPoE to each other, or change the Static IP on webpage, it will show the warning of restart as following.

Network settings have been changed, Are you sure re	boot the phone to save changes?
	确定 取消

#### WAN Port

To configure a static IP address via phone interface:

- 1. Press Menu→Setting→Advanced Settings (password: admin) →Network→WANPort  $\rightarrow$ Static mode.
- 2. Enter the parameters: IP, Netmask, Gateway, Pri. DNS(primary dns), sec. DNS(second DNS) in the corresponding fields.

# **E**-ltek

	Sta	atic mode	
1. IP:	192.168.0.104		<u>p</u>
2. Netmask:		255.255.255.0	ľ
3. Gateway:		192.168.0.1	
4. Pri.DNS:		218.2.135.1	
5. Sec.DNS:		8.8.4.4	

3. Click Save and restart the phone.

WARNING	
System will restart, an	e you sure!
Cancel	ок

Press the Save soft key to accept the change or the Back soft key to cancel. If you are using an xDSL modem, you can connect your phone to the Internet via PPPoE mode. You can set a WAN port to be a PPPoE port. The PPPoE port will perform a PPP negotiation to obtain the IP address. Contact your system administrator for the PPPoE user name and password.

#### To configure PPPoE via phone interface:

- Press Menu→Setting→Advanced Settings (password: admin) →Network→WANPort →PPPoE mode.
- 2. Enter the User ID and password
- 3. Click Save and restart the phone.

# **E**-ltek

#### To configure DHCP via phone interface:

- Press Menu→Setting→Advanced Settings (password: admin) →Network→WANPort →DHCP mode.
- 2. Click Save and restart the phone.

#### To configure Network via web interface:

- 1. Click Network  $\rightarrow$  Basic
- 2. Select the desired Type: DHCP, Static or PPPoE
- 3. Filled the necessary information.
- 4. Click the SaveSet and restart the phone.

## **Contact Management**

This section provides the operating instructions for managing contacts. The topics include:

- Local Directory
- Blacklist
- Remote Phonebook
- Call History
- LDAP
- BroadSoft Phonebook
- CallLog

## **Local Directory**

In the directory, you can add or delete your friends, business partner or anyone others' phone No. so you will not forget their number. Or put some anonymous phone No. in the blacklist to prevent from being disturbed. The local Directory can add up to 1000 contacts.

#### A. To add contacts list into local directory

#### To add contacts manually via phone interface

- 1. Press Menu  $\rightarrow$  Directory  $\rightarrow$  Local Directory
- 2. Press Add soft key.
- 3. Enter the necessary information as Name, Phone number...
- 4. Press save soft key or () to add the contacts successfully.

Add Contacts					
1.Name:		Emma			
2.Number:		302			
3.Mobile Nur	nber:				
4.Other Num	ber:				
5.Account:		Auto			
6.Ring Tone:		Default Ring			
Cancel	2aB	Delete	Save		

#### To add contacts from history via phone interface:

- 1. Press History soft key or press Menu  $\rightarrow$  History  $\rightarrow$  Local history
- 2. Press ind in to select the targeted one. (Press ind is switched among the All calls, Dialed calls, Received calls, Missed Calls and Forward Calls).
- 3. Press Option soft key  $\rightarrow$  Add to Contacts
- 4. Edit the necessary information as Name, Phone number...
- 5. Press save soft key or to add the contacts successfully.

#### Upload Contacts photo via web interface:

- 1. Click Directory and select the desired contact.
- 2. Click Choose file to select the photo for the contact
- 3. Click Upload Photo to upload the phote.

When you place a call from the contact, the phone idle screen will show the contact photo.

#### Note:

The format of the photo supported is jpg or bmp, and the size shoud be less than 128 \*128

#### To import or export the contact list

You can manage your phone's local directory via phone or web user interface. But you can only import or export the contact list via web interface.

1. Click on Directory

Htek

- 2. Click Browse to select a contact list file (file format must be .xml) from your local system.
- 3. Click Import XML to import the contact list.

#### To export an XML file of contact list via web interface:

- 1. Click on Directory
- 2. Click Export XML to import the contact list.

#### To import a CSV file of contact list via web interface:

- 1. Click on Directory
- 2. Click Browse to select a contact list file (file format must be .csv) from your local system.
- 3. Click Import Csv to import the contact list.

#### To export a CSV file of contact list via web interface:

- 1. Click on Directory
- 2. Click Export Csv to import the contact list.

Photo	Auto 🔻	Import Local Contacts
Add Edit	Search	Choose File No file chosen
GroupInfo		Import XML Export XML

#### To Dial a call from Call History via phone interface:

- 1. Press History soft key or press Menu  $\rightarrow$  History  $\rightarrow$  Local history
- 2. Press () and () to select the targeted one.
- 3. Press the Send soft key, or , or , or the corresponding line key.

## LDAP Phonebook

When use the LDAP feature, you can get the LDAP Phonebook directly.

#### To configure LDAP via web interface:

- 1. Login webpage and click Directory  $\rightarrow$  LDAP
- 2. Filled the LDAP Name Filter:
  - a) This parameter specifies the name attributes for LDAP searching. The "%" symbol in the filter stands for the entering string used as the prefix of the filter condition.
  - b) For example (cn=%), when the name prefix of the cn of the contact record matches the search criteria, the record will be displayed on the IP PHONE LCD.
- 3. Filled LDAP Number Filter:

This This parameter specifies the number attributes for LDAP searching.

- Filled Server Address: Fill the domain name or IP address of the LDAP Server. For example: 192.168.0.124
- 5. Port(the port of the LDAP Serve) Base, User Name, Password
- 6. Max.Hits(1-32000): the maximum number of the search results to be returned by the LDAP server.
- 7. LDAP Display Name: the display name of the contact record displayed on the LCD screen.
- 8. Filled the relative value and then click save button the save the settings.

Following is the example screenshot for the configuration.

Htek	Home   Account   N	etwork   Function Keys   Se	tting   Directory   Management
Directory	LDAP Name Filter	(en=%)	) NOTE

## **Other features settings**

## **Dial Plan**

Dial plan is a string of characters that governs the way this phone processes the inputs received from your phone keypad. This phone supports dial plan with following accept digits:

1,2,3,4,5,6,7,8,9,0,\*,#

Grammer	Description
x	any digit from 0-9;
xx+	at least 2 digit number;
^	exclude;

,	hear dial tone;
[3-5]	any digit of 3, 4, or 5;
[147]	any digit 1, 4, or 7;
<2=011>	replace digit 2 with 011 when dialing.

#### To configure dial plan via web interface:

- 1. Click Account—Advanced—Dial Plan.
- 2. Filled the value in dial plan field.
- 3. Click SaveSet to save the configuration.

## **Emergency Call**

Public telephone networks in countries around the world have a single emergency telephone number (emergency services number), that allows a caller to contact local emergency services for assistance when required. The emergency telephone number may differ from country to country. It is typically a three-digit number so that it can be easily remembered and dialed quickly. Some countries have a different emergency number for each of the different emergency services. You can specify the emergency telephone numbers on the IP phone for contacting the emergency services in an emergency situation.

#### To configure emergency call via web interface:

- 1. Click Setting→Features→Phone Lock
- 2. Enter the emergency services number in the Emergency field
- 3. Click SaveSet to save the configuration.

### **Softkey Layout**

T.

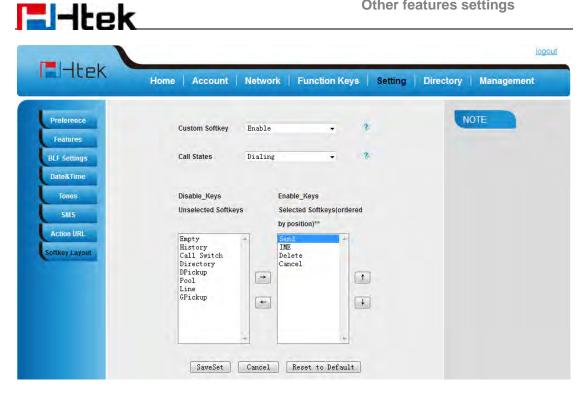

This feature mainly defines which shown on the soft key in some status. For example, what the soft key displays when dialing, or talking.

#### To configure Soft key via web interface:

- 1. Click Setting  $\rightarrow$  Soft key Layout
- 2. Select Enable for Custom Soft key
- 3. Select call States.
- 4. Select the feature form the disable key to enable key field by  $\square$

- 5. Click  $\uparrow$  or  $\downarrow$  to change to position or each feature.
- 6. Click SaveSet to save the configuration.

#### Note:

1. When there more than 5 items in the Enable field, the last soft key will display More, and last two item will show in the next page soft key, you can check by press more.

## **Programmable Key**

For the default keys as Soft keys, Navigation keys and so on, you can define them as some specific feature, and it works only on the idle page.

#### To configure Programmable Key via web interface:

- 1. Click Function Keys $\rightarrow$ Programmable Keys
- 2. Select the desired Key to set.
- SaveSet 3. Click to save the setting.
- Reset To Default 4. By clicking all setting of the keys will be back to default.

Suppress DTMF Display Delay	© Off ● On	
Voice Mail Tone	◉ On ◯ Off	
Busy Tone Timer (0~5s)	4	
SaveSet	Cancel	

## Placing a call by hands-free speakerphone

- 1. Press the  $\bigcirc$ , or press the Line key, then you can hear the dial tone.
- 2. Press the number.
- 3. Press  $\textcircled{\begin{subarray}{c} \# \\ \hline \end{subarray}}$  or  $\textcircled{\begin{subarray}{c} \end{subarray}}$ , or press the Send soft key, then the call is sending.

## To place a call by call history or Directory

1. Press the History soft key (On the idle page) or Menu  $\rightarrow$  History /Directory

2. Press  $\stackrel{[n]}{\frown}$  and  $\stackrel{[n]}{\frown}$  to select the targeted one.

3. Press the Send soft key, or B, or B, or the corresponding line key, then the call is sending.

Note:

- 1. The key is set to be a send key. For more information, refer to the Key as Send on page
- 2. During the call, you can also change among Headset, Handset or Free-speaker mode.

## Making two calls with one line and one account

- 1. Press a line key and dial one phone number, then make a call.
- 2. Press the corresponding line key
- 3. Dial another phone number,
- 4. Press the Send soft key, or , then make the second call.

## End a Call

Here shows to end a call during three mode:

## To end a call by Handset

Press the Cancel soft key or hang up the handset, or press (x)

## To end a call under Headset Mode

Press the Cancel soft key or press  $\bigcirc$ , or press  $\bigotimes$ .

## To end a call under hands-free speakerphone Mode

Press the Cancel soft key or press (), or press ().

## Note:

1. During the conference, to end the call is same as mentioned above.

## **Redial a Call**

- 1. To redial the last placed call from the IP Phone
- 2. Press is directly when LCD is on the idle interface.

## **Receive a Call**

There are three ways to receive a call when the phone is ringing:

## To receive a call by handset

Pick up the handset the conversation is built.

## To receive a call by headset

Press ( and now the conversation is built.

## To receive a call by hands-free speaker

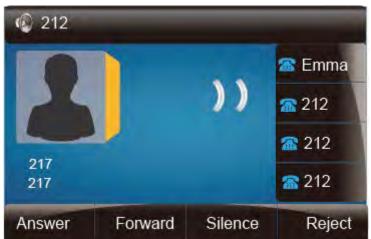

- 1. Option 1: Press indirectly.
- 2. Option 2: Press Answer soft key.
- 3. Option 3: Press the Line key (flashes red).

Moreover, some other action can be done by soft key when the call is coming.

- 1. To press the Reject soft key to reject the call. Or press  $\bigotimes$  to reject the current call.
- 2. To press Forward to forward to another phone.
- 3. To press Silence soft key, and then the call will keep silent, no ring tone display.

## **Incoming Call Show Mode**

There are two incoming call show mode for this phone:

- 1. name and number of the contacts
- 2. name and number of the incoming call and the account which is connecting

#### To set incoming call show mode via web interface:

- 1. Click setting  $\rightarrow$  preference
- 2. Select the desire mode for the incoming call show mode
- 3. Click SaveSet to save the setting.

Incoming Call Show Mode

Peer Name & Peer Number
 Peer Name & Peer Number & Self Name

## **Auto Answer**

Enable auto answer feature, you will answer all incoming call automatically.

To enable Auto Answer via Webpage

1. To Click Account  $\rightarrow$  Advanced

2. To choose Yes for the Auto Answer.

3. To click Saveset to save the configuration.

LED Status Setting:	
Power Status	◉ Yes ◯ No
Ringing Status	◉ Yes ◯ No
MissCalls Status	🛇 Yes 🛛 🔍 No
Voice Message Status	◯ Yes
Incoming Call Show Mode	Peer Name & Peer Number
	Peer Name & Peer Number & Self Name

#### To Disable Auto Answer via Webpage

- 1. To Click Account  $\rightarrow$  Advanced
- 2. To choose No for the Auto Answer.
- 3. To click Saveset to save the configuration.

## **Call Hold**

When use hold feature, the Hold icon will show on the display.

To make a call on hold during three modes:

## To hold a call under handset mode:

- 1. Press Hold soft key or ( to hold the current call.
- 2. Press Resume soft key or ( to resume the call on hold.

## To hold a call under headset mode:

- 1. Press Hold soft key or to hold the current call.
- 2. Press Resume soft key or ( to resume the call on hold.

## To hold a call during the speaker mode:

- 1. Press Hold soft key or to hold the current call.
- 2. Press Resume soft key or to resume the call on hold.

## **Call Transfer**

This phone supports blind, attended and Semi-Attended Transfer.

## **Blind Transfer**

When you use this feature, you can transfer

- 1. Press () or Transfer soft key during the conversation, the call is on hold now.
- 2. Enter the number that transfers to.
- 3. Press (), and now the blind transfer completed.

## NOTE:

The "Enable Call Feature" must be configured to "Yes" to enable this feature (Account $\rightarrow$ Advanced).

## **Attended Transfer**

When you use this feature, you can

1. Press or transfer soft key during the conversation, the call is on hold now.

- 鎩 2. Enter the number that transfer to, and press the send soft key or
- 3. Start the second conversation, press () or transfer soft key, then, transfer completed.

Delete

Cancel

## NOTE:

To transfer calls across SIP domains, SIP service providers must support transfer across SIP domains. Blind transfer will usually use the primary account SIP profile.

## Semi-Attended Transfer

- 1. Press () or transfer soft key during the conversation, the call is on hold now.
- 2. Enter the number transfer to, and then press \_\_\_\_\_, then you can here the ring tone.
- 3. Press () or the Tran soft key, and now the Semi-attended transfer completed.

## **BLF Transfer**

- 1. Set a Programmable Key or line key is set as BLF. For how to set BLF, please refer to BLF
- Press () or transfer soft key during the conversation, the call is on hold now. 2.
- 3. Press BLF key then realize blind, attended and Semi-Attended Transfer.

## Hold transfer on hook:

- 1. Setting  $\rightarrow$  Features  $\rightarrow$  Transfer Setting: Hold Transfer On Hook: ON.
- 2. A place a call to B, B answer, A press the hold softkey and place a call to C, A cancel the call

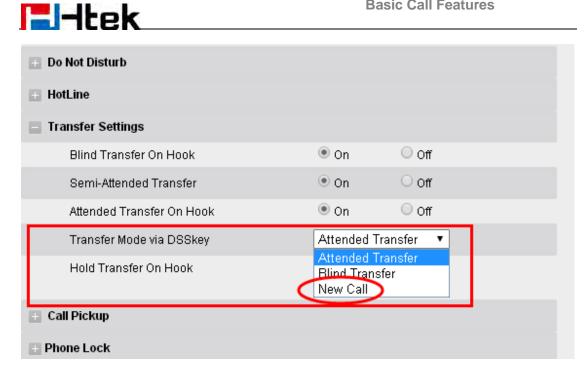

when C is ringing or answering, then C and B in the same call and the transfer is successful.

## **Call Conference**

This IP Phone supports up to 5-way conference.

## 5-way conference

- 1. Assuming that call party A and B are in conversation. A wants to bring C, D and E in a conference
- 2. A press line 2 key, the call is placed on hold.
- 3. A enter the number of C and then press send soft key or  $\boxed{\text{ for }}$ .

- 4. C answering the call.
- 5. A press or the conference soft key, then A, B and C are now in a conference.(and now this is **3-way conference**)
- 6. A press line 3 key, the current 3-way conference is placed on hold.
- 7. A enter the number of D and then press send soft key or  $\boxed{\text{H}}$ .
- 8. D answering the call.
- 9. A press or the conference soft key, then A, B, C and D are now in a conference.(and now this is **4-way conference**)
- 10. A press line 4 key, the call is placed on hold.
- 11. A enter the number of E and then press send soft key or  $\square$ .
- 12. E answering the call.
- 13. A press (a) or the conference soft key, then A, B, C, D and E are now the **5-way conference** is built.
- 14. A end the call, the conference is finished.

Note:

- 1. If C does not answer the call, A can back to continue the conversation with B;
- 2. Once A hangs up the call, the conference is ended, while if B or C drops the call, A&C or A&B conversation continues.
- **3.** The conference feature is not available on all servers. For more information, contact your system administrator.
- 4. To realize the 5 way conference, the line should be all available.
- 5. Press to get all parties information.

## **Call Forward**

This phone supports static forward (always forward, busy forward and no answer forward) and dynamic forward

## To configure static forward

## To configure always forward

With this feature, all incoming calls will forward immediately to configured number.

- 1. Press Menu  $\rightarrow$  Features  $\rightarrow$  Call forward  $\rightarrow$  Always Forward.
- 2. Press > and < or press  $\boxed{1}$  to select the enable choice
- 3. Enter the forward to number and on code (optional), off code (optional).

4. Press or Save soft key to save the configuration.

## To configure busy forward

With this feature, the incoming calls are immediately forwarded if the phone is busy.

- 1. Press Menu  $\rightarrow$  Features  $\rightarrow$  Call forward  $\rightarrow$  Busy forward.
- 2. Press > and < or press  $\boxed{\textcircled{1}}$  to select the enable choice.
- 3. Enter the forward to number and on code (optional), off code (optional).
- 4. Press or Save soft key to save the configuration.

To configure no answer forward

No Answer Forward: Incoming calls are forwarded if not answered after some time.

1. Press Menu  $\rightarrow$  Features  $\rightarrow$  Call forward  $\rightarrow$  No answer forward.

**L**-ltek

- 2. Press  $\bigcirc$  and  $\bigcirc$  or press  $\bigcirc$  to select the enable choice
- 3. Enter the forward to number and on code (optional), off code (optional).
- 4. Press or Save soft key to save the configuration.

When the Forward feature is enabled, the Icon will display on Top of the LCD.

To configure Forward via Web Interface

- 1. Setting  $\rightarrow$  Feature
- 2. Click On for the Always/Busy/No Answer
- 3. Fill the Forward to Number
- 4. (Optional) fill the on/off code
- 5. Click SaveSet to save the configuration

The Htek IP Phone supports up to 5-way conference. You are allowed to configure the programmable key to be used as a conference key. This key works same as

#### To configure the Conference via Phone Interface

- 1. Press Menu →Features →Function Keys→Line keys as Function Keys →Line key1(for example)
- 2. Select the wanted Line key.
- 3. Press > and < or press  $\boxed{1}$  key to select the Conference in the type field.
- 4. Press or Save soft key to save the configuration

#### To configure Conference via Web Interface

- 1. Click Function keys  $\rightarrow$  Line Key.
- 2. Select the desired Key and select Conference in the Type.
- 3. Click the SaveSet button to save the configuration.

## Forward

If the key is configured as Forward key, press this key under the idle status, the IP phone will turn to the Always Forward interface and you can set the Forward to number, then when there is any call to the number will be forwarded to the set number automatically.

#### To configure the Forward via Phone Interface

- 1. Press Menu →Features →Function Keys→Line keys as Function Keys →Line key1(for example)
- 2. Select the wanted Line key.
- 3. Press and or press key to select the Forward in the type field.
- 4. Enter the Number that to forward.
- 5. Press or Save soft key to save the configuration

#### To configure Forward via Web Interface

- 1. Click Function keys  $\rightarrow$  Line Key.
- 2. Select the desired Key and select Forward in the Type.
- 3. Enter the Value with the number you want to forward
- 4. Click the SaveSet button to save the configuration.

## Transfer

You are able to configure the key as a transfer key to perform the Blind/Attended Transfer.

#### To configure the Transfer via Phone Interface

1. Press Menu → Features → Function Keys → Line keys as Function Keys → Line key1(for

example)

- 2. Select the wanted Line key.
- 3. Press and or press key to select the Transfer in the type field.
- 4. Enter the Number that transfer to
- 5. Press or Save soft key to save the configuration

#### To configure Transfer via Web Interface

- 1. Click Function keys  $\rightarrow$  Line Key.
- 2. Select the desired Key and select Transfer in the Type.
- 3. Enter the Value with the number that wanted transfer to
- 4. Click the SaveSet button to save the configuration.

## Hold

The key can be configured as a hold key. You can use this key to hold and resume a call during the conversation.

#### To configure the Hold via Phone Interface

- 1. Press Menu → Features → Function Keys → Line keys as Function Keys → Line key1(for example)
- 2. Select the wanted Line key.
- 3. Press  $\bigcirc$  and  $\bigcirc$  or press  $\bigcirc$  key to select the Hold in the type field.
- 4. Press or Save soft key to save the configuration

### To configure Hold via Web Interface

Htek

- 1. Click Function keys  $\rightarrow$  Line Key.
- 2. Select the desired Key and select Hold in the Type.
- 3. Click the SaveSet button to save the configuration.

## **Group Listening**

With this feature, when you active a call, you can listen using Handset and Free-speaker, but only can use the handset to speak.

#### To configure the Group listenning via Phone Interface

- 1. Press Menu →Features →Function Keys→Line keys as Function Keys →Line key1(for example)
- 2. Select the wanted Line key.
- 3. Press > and < or press  $\boxed{1}$  key to select the group listening in the type field.
- 4. Press or Save soft key to save the configuration

#### To configure Group listening via Web Interface

- 1. Click Function keys  $\rightarrow$  Line Key.
- 2. Select the desired Key and select Group listening in the Type.
- 3. Click the SaveSet button to save the configuration.

#### DND

If the key is configured as DND key, you are allowed to active the DND function immediately when you press it and the phone is to reject all incoming calls automatically. Press it again to

## To configure the DND via Phone Interface

- 1. Press Menu →Features →Function Keys→Memory keys as Function Keys → Memory key1(for example)
- 2. Select the wanted Memory key.
- 3. Press  $\bigcirc$  and  $\bigotimes$  key to select the DND in the type field.
- 4. Press or Save soft key to save the configuration

#### To configure DND via Web Interface

- 1. Click Function keys  $\rightarrow$  Memory Key.
- 2. Select the desired Key and select DND in the Type.
- 3. Click the SaveSet button to save the configuration.

#### To enable DND feature

Press the DND soft key when the phone is idle status, and then DND icon shown on the LCD.

#### To disable DND feature

Press the DND soft key again, and then there is no DND icon on the LCD.

## Redial

If the key is configured as Redial key, you can redial the last placed call from the IP Phone.

#### To configure Redial via Web Interface

- 1. Click Function keys  $\rightarrow$  Line key/Memory key
- 2. Select the desired Key and select redial in the Type.
- 3. Enter the Label displayed on LCD.

# **-**ltek

4. Click the SaveSet button to save the configuration.

## SMS

## Send SMS

#### To send SMS via web Interface

- 1. Click Setting  $\rightarrow$  SMS
- 2. Select the account(from which account the SMS sent)
- 3. Enter the target number
- 4. Input the content of SMS, and click Send.

To send SMS via phone interface:

- 1. Click Menu→Message→Text Message→Set SMS
- 2. Enter the contents in the white field.
- 3. Press the save button
- 4. Select the account (from which account the SMS sent)
- 5. Enter the target number (to which account the number sent)

6. Press the Send button.

## Set SMS Line Key

#### To configure the SMS via Phone Interface

- 1. Press Menu →Features →Function Keys→Line keys as Function Keys →Line key1(for example)
- 2. Select the wanted Line key.
- 3. Press > and < or press  $\boxed{1}$  key to select the SMS in the type field.
- 4. Press or Save soft key to save the configuration

#### To configure SMS via Web Interface

- 1. Click Function keys  $\rightarrow$  Line Key.
- 2. Select the desired Key and select SMS in the Type.
- 3. Click the SaveSet to save the configuration.

## Record

With record feature, you can record calls by pressing a record key on the phone.

#### To configure the record via phone interface

- 1. Press Menu →Features →Function Keys→Line keys as Function Keys →Line key1(for example)
- 2. Select the wanted Line key.
- 3. Press > and < or press  $\bigcirc$  key to select the Record.

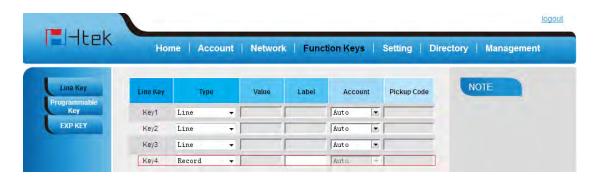

4. Press or Save soft key to save the configuration

#### To configure the record via Web Interface

- 1. Click Function keys  $\rightarrow$  Line key.
- 2. Select the desired Line or Memory key and select Record in the Type.
- 3. Click the SaveSet button to save the configuration.

Note:

Please contact the system administrator whether support this feature or not.

## **URL Record**

The phone sends HTTP URL request to trigger a recording. Contact your system administrator for the predefined URL.

#### To configure the URL record via phone interface

- 1. Press Menu →Features →Function Keys→Line keys as Function Keys →Line key1(for example)
- 2. Select the wanted Line key.
- 3. Press and or press key to select the URL Record.
- 4. Press () or Save soft key to save the configuration

#### To configure the record via Web Interface

- 1. Click Function keys  $\rightarrow$  Line key.
- 2. Select the desired Line or Line key and select URL Record in the Type.
- 3. Click the SaveSet button to save the configuration.

## Paging

With this feature, you can call a paging group directly.

#### To configure the paging via phone interface

- 1. Press Menu →Features →Function Keys→Line keys as Function Keys →Line key1(for example)
- 2. Select the wanted Line key.
- 3. Press > and < or press  $\bigcirc$  key to select the Paging.
- 4. Enter the paging code followed the number.
- 5. Press or Save soft key to save the configuration

#### To configure the Paging via Web interface

1. Click Function keys  $\rightarrow$  Line key.

- Htek
- 2. Select the desired Line key and select Paging in the Type.
- 3. Enter the paging code followed the number.
- 4. Click the SaveSet button to save the configuration.

## **Shared Line**

This feature allows subscribers to share SIP lines. Moreover it also provides status monitoring of the shared line.

#### To configure the line key as shared line via phone interface

- 1. Press Menu →Features →Function Keys→Line keys as Function Keys →Line key1(for example)
- 2. Select the wanted Line key.
- 3. Press > and < or press  $\boxed{1}$  key to select the Shared Line in the type field.
- 4. Press > and < or press  $\boxed{1}$  key to select the Account ID.
- 5. Enter the Label
- 6. Enter the Value
- 7. Press  $\bigcirc$  or Save soft key to save the configuration

#### To configure the line key as shared line via Web Interface

- 1. Click Function keys  $\rightarrow$  Line key.
- 2. Select the desired Line key and select Shared Line in the Type.
- 3. Enter the Value.
- 4. Enter the Label.

#### 5. Select the Account ID

6. Click the SaveSet button to save the configuration and then restart.

#### Note:

This feature is not available on all servers. For more information, contact your system administrator.

## **Public Hold**

The key can be configured as a public hold key. During a conversation, all members belonging to that particular SLA group can use this key to hold or resume a call.

#### To configure the Public hold via phone interface

- 1. Press Menu →Features →Function Keys→Line keys as Function Keys →Line key1(for example)
- 2. Select the wanted Line key.
- 3. Press > and < or press  $\boxed{1}$  key to select the Public Hold.
- 4. Press () or Save soft key to save the configuration

#### To configure public hold via Web Interface

- 1. Click Function keys  $\rightarrow$  Line Key.
- 2. Select the desired Key and select public hold in the Type.
- 3. Click the SaveSet button to save the configuration.

## Share line

Shared line is configured by assigning the same extension number to multiple lines. You can use the shared line feature to share an extension number which is used on two or more IP phones at the same time. An incoming call to that number will cause all phones to ring simultaneously. The incoming call can be answered on one of the phones but not all of them. This feature is very useful in the boss and secretary scenario. For example, the secretary can share the boss' extension number on her phone. When there is an incoming call to the extension number of the boss, both the phones of the boss and the secretary will ring simultaneously. Either the boss or the secretary can answer the call. Calls on shared line can be placed on hold or barged in.

#### To configure the share line via phone interface

- 1. Press Menu →Features →Function Keys→Line keys as Function Keys → Line key1(for example)
- 2. Select the wanted Line key.
- 3. Press > and < or press  $\boxed{1}$  key to select the share line.
- 4. Enter the number in the value field.
- 5. Select the desired account in the Account field.
- 6. Press or Save soft key to save the configuration

#### To configure the share line feature via web interface:

- 1. Click Function keys  $\rightarrow$  line Key.
- 2. Select the desired Key and select share line in the Type.
- 3. Enter the number in the value field.
- 4. Select the desired account from the pull-down list of Account field.
- 5. Click the SaveSet button to save the configuration.

#### Note:

This feature is not available on all servers. For more information, contact your system administrator.

## **Hot Desking**

Hot Desking originates from the definition of being the temporary physical occupant of a work station or surface by a particular employee. A primary motivation for Hot Desking is cost reduction. This feature is regularly used in places where not all the employees are in the office at

the same time, or not in the office for very long at all, which means actual personal offices would be often vacant, consuming valuable space and resources.

You can use Hot Desking on the IP phone to logout the existing accounts and then log in a new account, that is, many users can share the phone resource in different time. To use this feature, you need to configure a Hot Desking key in advance.

This feature is supported on the version 1.0.3.82 or later

#### To configure the hot desking via phone interface

- Press Menu → Features → Function Keys → Line or Memory keys as Function Keys → Memory key1(for example)
- 2. Select the wanted Line or Memory key.
- 3. Press and or press key to select the hot desking.
- 4. Enter the display name in the value field.
- 5. Press or Save soft key to save the configuration

#### To configure the hot desking via web interface:

- 1. Click Function keys  $\rightarrow$  Memory Key.
- 2. Select the desired Key and select hot desking in the Type.
- 3. Enter the number in the value field.
- 4. Select the desired account from the pull-down list of Account field.
- 5. Click the SaveSet button to save the configuration.

#### To use the Hot desking feature on the user interface:

- 1. Press the Hot desking key when the IP Phone is idle.
- 2. Enter the Extension number and password

# **El-Itek**

	HotDe	esking	
1.User Nam	e:		
2.Password	:		
Cancel	123	Delete	Save

<sup>3.</sup> Click Save softkey

You can see the account information which has changed.

#### Note:

This feature is not available on all servers. For more information, contact your system administrator.

## ACD (Pending)

ACD feature is often used in offices for customer service, such as call center. The ACD system handles large volumes of incoming calls from callers who have no need to talk to a specific person but who require assistance from any of multiple persons at the earliest opportunity. The ACD feature on the Htek IP Phone allows the ACD system to distribute calls from large volumes of incoming calls to the registered IP phone users. To use this feature, you should configure an ACD key in advance.

#### To configure the ACD via phone interface

- 1. Press Menu → Features → Function Keys → Line keys as Function Keys → line key1(for example)
- 2. Select the wanted Line key.
- 4. Enter the label in the label field.
- 5. Select the desired account in the Account field.
- 6. Press () or Save soft key to save the configuration

# 

#### To configure the ACD via web interface:

- 1. Click Function keys  $\rightarrow$  Line Key.
- 2. Select the desired Key and select ACD in the Type.
- 3. Enter the label in the label field.
- 4. Select the desired account from the pull-down list of Account field.
- 5. Click the SaveSet button to save the configuration.

#### Note:

This feature is not available on all servers. For more information, contact your system administrator.

## Zero Touch

You can use this key feature to configure auto provision and network parameters quickly. This feature is supported on the version 1.0.3.82 or later

#### To configure the zero touch via phone interface

- 1. Press Menu → Features → Function Keys → Line keys as Function Keys → line key1(for example)
- 2. Select the wanted Line key.
- 3. Press and or press is key to select the zero touch
- 4. Press Or Save soft key to save the configuration

#### To configure the zero touch via web interface:

- 1. Click Function keys  $\rightarrow$  Line Key.
- 2. Select the desired Key and select zero touch in the Type.
- 3. Click the SaveSet button to save the configuration.

#### To use the zero touch feature on the user interface:

- 1. Press the zero touch key when the IP Phone is idle.
- 2. The IP Phone will enter the WAN Port interface, you can change the WAN Type by pressing the Navigation keys.
- 3. Press the Next softkey to enter Network interface, then you can configure some information.
- 4. Press the Next softkey again, you can configure auto provision information.
- 5. When you finish the setting, you can press the OK to accept the changes.

#### Note:

This feature is not available on all servers. For more information, contact your system administrator.

## Upgrade

## **Factory Reset**

#### To set Factory Reset by phone interface

- 1. Press Menu → Setting → Advanced Setting( default password: admin)→ Factory Reset
- 2. Press OK soft key in the warning page.

#### To set Factory Reset via web interface

- 1. Click Management  $\rightarrow$  Upgrade
- 2. Click Reset To Factory and then confirm the setting.

## Upgrade

To upgrade via HTTP, the "Management"->"auto provision" ->" Firmware Upgrade"-> "Upgrade Mode" field needs to be set to HTTP, respectively. "Firmware Server Path" needs to be set to a valid URL of a HTTP server, server name can be in either FQDN or IP address format. Here are examples of some valid URL.

- e.g. firmware.mycompany.com:5688/Hanlong
- e.g. www.mycompany.com:5688/fm/ Hanlong
- e.g. 218.2.83.110

#### Instructions for firmware upgrade via HTTP:

(1) End users can choose to download the free HTTP server from http://httpd.apache.org/ or use Microsoft IIS web server. Then setup HTTP server.

(2) Unzip the firmware file and put all of them under the *root*/fm directory of the HTTP server.

(3) Visiting "HTTP:\\192.168.0.254\fm\fw8xx.rom on localhost by browser" to verify the HTTP Server. If visiting "HTTP: \\192.168.0.254\fm\fw8xx.rom on other computer is no prompt to download fw8xx.rom file, please check the firewall (Suggest close the firewall).

To configure the server path via web interface:

- 1. Click Management  $\rightarrow$  Auto provision:
- 2. Select the upgrade mode in the upgrade mode field
- 3. Enter the Firmware server path and config server path (192.168.0.254 is HTTP server).
- 4. Enter the HTTP server's username and password (optional).
- 5. Click the SaveSet button to save the configuration.
- 6. Restart the UC8xx, IP Phone will restart and auto-get firmware files from HTTP server.

	Firmware/Config File Prefix					

#### NOTES:

- Hanlong recommends end-user use the Hanlong HTTP server. For large companies, we recommend to maintain their own TFTP/HTTP/FTP/HTTPS server for upgrade and provisioning procedures.
- Once a "Firmware Server Path" is set, user needs to update the settings and restart the IP Phone. If the configured firmware server is found and a new code image is available, the UC8xx will attempt to retrieve the new image files by downloading them into the UC8xx's SDRAM. During this stage, the UC8xx's LEDs will blink fastly until the checking/downloading process is completed. Upon verification of checksum, the new code image will then be saved into the Flash. If TFTP/HTTP/FTP/HTTPS fails for any reason (e.g. TFTP/HTTP/FTP/HTTPS server is not responding, there are no code image files available for upgrade, or checksum test fails, etc), the UC8xx will stop the TFTP/HTTP/FTP/HTTPS process and simply boot using the existing code image in the flash.
- Firmware upgrade may take as long as 3 to 8 minutes over Internet, or just 1 minutes if it is performed on a LAN. It is recommended to conduct firmware upgrade in a controlled LAN environment if possible. For users who do not have a local firmware upgrade server.

- ➢ Hanlong's latest firmware is available at <u>http://www.h-tek.com</u> →Support→Firmware Download.
- Oversea users are strongly recommended to download the binary files and upgrade firmware locally in a controlled LAN environment.

#### To upgrade manually via the Web configuration interface

# Troubleshooting

## Why is the phone LCD screen blank?

- 1. Ensure your phone is properly plugged into a functional AC outlet.
- 2. Ensure that the phone isn't plugged into a plug controlled by a switch that is off.
- 3. If the phone is plugged into a power strip, try plugging it directly into a wall outlet instead.
- 4. If your phone is powered from PoE, ensure you use a PoE compliant switch or hub, or contact your system administrator for more information.
- 5. Check that the power LED is on to ensure the phone is powered on.

## Why does the phone display "Network Unavailable"?

- Ensure that the Ethernet cable is plugged into the Internet port on the phone and the Ethernet cable is not loose.
- Ensure that the switch or hub in your network is operational.
- Contact your system administrator for more information.

## Why can't I get a dial tone?

- Check for any loose connections and that the phone has been installed properly. For the Installation instructions, refer to <u>Phone Installation</u>.
- Check whether dial tone is present on one of the audio modes.
- Switch between the Handset, Headset (if present) or Hands-Free Speakerphone to check whether dial tone is present for one of the audio modes.
- If the dial tone exists on another audio mode, connect a different handset or headset to isolate the problem.

#### Where to set the tone?

You can set the tone on web interface:

- Click Setting $\rightarrow$ Tones
- Define the dial tone, ringing, busy tone...
- For the tones, you can check with your system administrator.
- More Click <u>Tone Notes</u>.

Htek
